Harold WEisberg,

Thank you for exposing Gerald Posner for the Fraud he is. I'm just sorry that your book CASE OPEN hasn't enjoyed the same fanfare and hype That posner's so undeservedly Received. I really wanted to read his book and pick it apart piece by piece with actual evidence that has come to light over the years from legitimate authors and researchers such as yourself, but I didn't want to purchase his book and put any of my money in his lying hands.

Like so many of the people you say you receive letters from, I wasn't born until after the assassination — A whole 5 months after the assassination. As I learned of The assassination over the years the official version just didn't ring true. I have read as much as I can on the subject over the years, while shying away from the sensational and ridiculous Like Mortal Error and Cased closed (which should be retitled Mind Closed). I'm not a conspiracy buff, or nut as the Status Quo Prefers to label people who are just looking for the truth, that the government and The media continue to hide from us.

I'm overcome with a feeling of angry helplessness every time I see Arlen Specter, Robert Blakey And Gerald Ford, or posner defending the Warren Report. I feel Like no one not even in Government Service can be this ignorant, so they must be lying.

I Also found it difficult to believe the media Frenzy over Posner's book. Every time I saw his Rodent-Like Features on television, I couldn't stand it because the interviewer would take

everything he said as gospel and not question anything. If an opposing view was solicited, they didn't get an equal amount of time. One of the most painful I saw other than the one on CNN that you mentioned in your book was on 20/20 where the whole segment was dedicated to this "genius" Posner and his computer enhancements. Then they go to Mark Lane for his opinion of this "groundbreaking" evidence of Posner's work. All Lane was allotted was a harmless soundbite, "Everyone is entitled to their computer." Maybe 5 seconds of on air time compared to the fifteen to twenty minutes Posner was given.

This media slant, bias, ignorance or whatever you want to call it is disgraceful and frightening. How can they praise a book of lies about the overthrow of an American president and not question it? Yet this same media attacks anyone with a contrary opinion to the official Lone Gunman report. Oliver Stones movie, though it may have had flaws, was attacked before it was even through shooting. It questioned the Warren Report and opened up the subject to a larger audience. At least, unlike the Warren Report and Case Closed Oliver Stone was open about JFK being a work of fiction. There was nothing at the begining of the film claiming the following was a true story.

What does Robert Blakey say about Oliver Stone? That "he should be stoned (pun intended") for unleashing such a lie on the American people. Maybe the hypocrite forgot about his stint on the House Select

Committee on assassinations, or is lying okay as long as it has the government's stamp of approval?

So I Thank you again for dedicating most of your life to finding the truth and I would like information and prices for ordering the Books that you have listed at the begining of case open, so that I can purchase them. I haven't read any of the books listed and would like to read them in chronological order. Thank you

And. I would appreciate information and prices for ordering those books one at a time
